Summary

Adobe Illustrator Designer } with hands-on experience in creating vector artwork, print-ready designs, logo tracing, image editing, and layout preparation using Adobe Illustrator and Photoshop. Skilled in handling print production requirements, color correction, typography, artwork modifications, and pre-press file preparation. Strong attention to detail with the ability to deliver accurate, high-quality designs within deadlines.

Quick Guide

- Proficient in Adobe Illustrator for creating vector graphics, logo tracing, artwork editing by using pen tool, and print-ready designs.
- Knowledge of print production workflows, ensuring design accuracy, quality checks, and timely delivery of print materials.
- Developed responsive, user-centered interfaces optimized for desktop, tablet, and mobile devices, ensuring consistent performance and seamless cross-platform user experiences.
- Contributed to the development of scalable design systems and reusable UI components, improving design consistency and accelerating design-to-development workflows.

Education

University of Madras, Bachelor of Commerce in Computer Applications Sep 2022 – May 2025

- CGPA: 6.3/10 - **2025 Batch**

Experience

IEDEO Software Lab – UI/UX Intern , Remote – Velachery, WH Nov 2025 -Feb 2026

- Created vector graphics, icons, and visual assets using Adobe Illustrator.
- Designed sitemaps, wireframes, and responsive UI interfaces in Figma, ensuring consistency across multiple devices and screen sizes while maintaining usability and visual hierarchy.
- Collaborated with senior UX/UI designers to translate business requirements into data-driven, user-centric design solutions, enhancing interaction efficiency, streamlining user journeys, and improving overall product performance.

Hex Software Intern, Remote – Bengaluru, WH NOV 2025 - DEC 2025

- Designed digital and print-oriented graphics using Adobe Illustrator and Photoshop.
- Delivered 3 end-to-end UI/UX design projects within a one-month timeline at Hex Software, independently managing the full design lifecycle from concept to final delivery, ensuring timely execution under tight deadlines.
- Leveraged Figma for wireframing and prototyping, Canva for visual design, and Adobe Photoshop for asset optimization to create intuitive, user-centric interfaces, translating business requirements into visually engaging solutions that improved usability and aligned with product goals.

Lane consultancy , – Perambur,Chennai, Telecaller SEP 2024 – MAY 2025

- I worked as a senior caller for Credit card services. My main task was to call customers with outstanding payments and recover the money owed
- Steps in the Banking Process for Credit Card Recovery. Sometimes involved dealing with difficult situations and using a firm tone to ensure payment

Cameo Corporate Services Ltd. , – Mount Road, Chennai, Telecaller MAR 2023 – AUG 2024

- I worked as a telecaller at Cameo Corporate Services, specifically handling Airtel MNP services
- I am skilled at explaining the MNP process and highlighting the benefits of remaining on the Airtel network.

- I am skilled at handling customer inquiries related to SIM card activation and porting.

Projects

Chatbot UX Design

<https://www.behance.net/AjaiKarthick>

- Chatbot UX Design Designed a structured conversational UX for a chatbot interface by mapping user journeys, defining Information Architecture (IA), and creating wireframes in Figma, resulting in improved interaction clarity and seamless user flow across key touchpoints.

School ERP User Panel

<https://www.behance.net/AjaiKarthick>

- In my School ERP project, I conducted User Research and applied Design Thinking to create intuitive User Flows, Wireframes, and scalable UI Components for parents, teachers, and HR panels. I focused on Interaction Design, Accessibility, and building a consistent Design System while continuously improving the experience through Prototype Testing and client feedback in Figma.
- Additionally, I designed a fully responsive app and website using a Mobile-First Design approach, ensuring seamless Responsive Design across both mobile and web platforms for every user panel.
- Tools Used: Figma, Chat GPT, Documentation, Lovable AI, Stitch

DTP Mobile Graphics Design

<https://www.behance.net/AjaiKarthick>

- Chatbot UX Design DTP Mobile Graphic Design is the process of creating accurate mobile layouts for different smartphone models. I use Adobe Illustrator to design precise front, back, and full-body templates for brands like OnePlus, Redmi, Nokia, and more. These designs are prepared for high-quality DTP printing and are used to create custom mobile skins and graphic products.

Certificate

IEDEO Software Lab : UI/UX Designer Intern

Hex Software : UI/UX Designer Intern

Government Certified: Typewriting

Marketing: Fundamental Digital Marketing

Tech: Artificial Intelligence (AI), Claude 101 Anthropic

Technologies

Languages: HTML5, CSS3, JavaScript, Front-End Development

Technologies: Adobe Illustrator, Figma, Photoshop, Lightroom, Canva
